Abstract (en)  
[origin: WO2007063562A1] Induction furnace (1) including an infiltration around said crucible (7), said crucible (7) being provided with walls (10, 11, 12) defining an infiltration chamber (13) such as to house a workpiece (14) to be subjected to infiltration and a material (15) to be infiltrated into porosities present in said workpiece characterized in that said walls of the crucible (7) are made in Carbon/Carbon and can be heated through inductive effect by, said coil (8) in order to heat said infiltration chamber (13) to a temperature such as to enable melting of said material (15) and infiltration of said material (15) into said workpiece (14).
