Abstract (en)

[origin: EP1955604A1] A filling device has a supply element (17) for supplying empty containers (11) into the region of a filling magazine (18), where each container (11) has vault walls (13) for forming several vaults (12) within the container (11). A storage zone (21) for forming several adjacent vaults (27) has partitioning walls which extend largely over the total height on the storage zone (21) and the back-wall (24) of the storage zone has openings for passage of the container (11) vault walls (13). Independent claims are included for the following. (1) (A) A method for filling containers (2) (B) A filling magazine for container filler.
