Abstract (en)  
[origin: EP1955959A1] The package has a set of stacked trays (2-4) for containing products, and a base for supporting the trays, where the trays are folded one on the other. The package is made of a cardboard. The base is arranged in a cardboard open-end box (5) i.e. slotted box, of the trays during transport of the package. The trays are fixed on a cardboard pallet, and the trays, the open-end box and the pallet are contained in a cardboard envelope, where the envelope forms a cover. The envelope is closed on an upper part by flaps folded at right angle. An independent claim is also included for a method for assembling a display package.
