Abstract (en)

[origin: EP1956145A1] The barrier (1') has a concrete floor (4'), which is provided with a cover (5'). The cover has a damping material arranged one over the other in layers (10,10') and arranged parallel in modules. A wire mesh (11) is provided for each layer and for each module. The material is utilized as damping material with a small sealing as gravel and good damping features.
