Abstract (en)

[origin: DE202007001975U1] The vehicle door lock has at least one actuating /locking element (1) which is mounted free of play through two or more spaced bearing blocks which engage at the end and/or centrally on the locking element. The bearing blocks and/or actuating and locking element can each have spring elements in the bearing area (5). The two bearing blocks can form constituent parts of a lock cover and/or lock housing : The bearing blocks and/or actuating and locking element can be made wholly or in part from plastics.
