Abstract (en)
[origin: EP1956291A1] The invention relates to a suspended projector including a projector (1), a case (5) housing electronic equipment and an adaptor (6) having an upper connection area (6a) inserted into the interior (3) of a rail (2) such that it can move along the length thereof and a lower area (6b) coupled to the projector (1). During operation, the device (1) is suspended from the rail (2) by the adaptor (6) and can be positioned along the length of same, said adaptor (6) being completely concealed with the lower area (6a) thereof housed in the casing (5) and the upper area thereof housed in the rail. The adaptor (6) can move longitudinally in relation to the casing (5) and elastic means (8) are provided in order to maintain the adaptor (6) housed inside said casing (5). In this way, mounting and removal operations are facilitated, with a good aesthetic finish being provided once the device (1) has been mounted by concealing the adaptor (6).
