Abstract (en)

[origin: WO2007059765A1] The invention relates to the use of behavior-modifying, preferably organic compounds having repellent, deterring and inhibitory effects for substantially reducing the infestation of woody plants, especially in chestnut (*Aesculus*) and acorn (*Acer*) varieties with parasites, especially chestnut leaf miner (*Cameraria ohridella*) and acorn leaf miner. The preferably organic compounds are emitted either by herbivorous arthropods and their accompanying microorganisms or by infested leaves of the horse chestnut (*Aesculus hippocastanum*) and can be obtained from the same.
