Abstract (en)
[origin: WO2007144694A2] A natural pesticide includes a combination of garlic oil and mustard oil impregnated in a carrier. The carrier may be an absorbent composition formed from corncob particles, and in particular the woody ring and chaff of the corncob. The combination of garlic and another essential oil, such as mustard oil, has a synergistic effect for inhibiting the growth of bacteria, fungi, and eradicating insect pests.
