Abstract (en)
[origin: WO2007042971A2] The present invention relates to functional footwear of a new concept, which adapts itself to the shape of a foot and gives a soft feeling when walking. The footwear includes: an upper foot fixing section for covering and fixing an upper portion of a foot; and a foot supporting section attached to the upper foot fixing section for supporting a lower portion of the foot. The foot supporting section includes a resilient mat having a soft elastic body, which can be deformed according to the shape of the foot. The footwear has a simple structure and can give a feeling of walking barefoot on a sponge mat or on a lawn like a soft carpet to provide complete comfort to the wearer during walking.
