Abstract (en)
[origin: DE102005057160A1] The housing has front and side edges at the top. At least one of these edges has at least one fixing tab (8, 12), by which a coupling plate (5) can set the housing in a closed-up position or in a position at a spacing from a wall or furniture. It may be possible to turn the tabs round the edge between the closed-up and spaced-out positions.
