Abstract (en)
[origin: WO2007066042A2] The invention relates to the use of a coextruded multilayer film for protecting a (ligno)cellulose material, wherein said multilayer film consists of the following arranged to each other layers: a surface layer (I) comprising PVDF and possibly PMMA in the form of the main components, an intermediate layer (II) comprising in the form of main components 0-60 PVDF parts, 40-100 PMMA parts, 0-25 acrylic elastomer parts and 0-10 UV absorber parts, the totality thereof being equal to 100 parts, and an adhesive layer (III), which comprises a functional PMMA in the form of the main component and is arranged on the side of the (ligno)cellulose material.
