Abstract (en)

[origin: DE102005058475B3] The deployment device has a tracking device (25) on one end of an oblong support (12) pivotably joined to a holding cable (17) in its central region and a pivoting device activated after unlatching of the vessel (10) from a holding device (13) for pivoting the support from a deployment position to a tracking position in which the tracking device lies under the support linkage point.
