Abstract (en)

[origin: WO2007065488A1] The present invention relates to an apparatus for triggering an intercepting means on a lift car or a conveying arrangement of a lift installation, having a brakeable limiter cable (122) which is connected to the lift car or the conveying arrangement, it being possible for the intercepting means to be triggered by virtue of the limiter cable (122) being braked, characterized by a triggering mechanism (120) which is arranged between the limiter cable (122) and the lift car or the conveying arrangement, is connected to two ends (122a, 122b) of the limiter cable (122) and is mounted in a movable manner on the lift car or the conveying arrangement (110).
