Abstract (en)  
[origin: WO2007062692A1] The invention relates to a pressure-sensitive adhesive tape, in particular for producing or gluing optical liquid crystal displays (LCDs). Said tape has light-reflecting and light-absorbing properties, a lower side and an upper side, and a support film, which has an upper side and a lower side, said adhesive tape being provided on both sides with an adhesive layer. A silver-coloured or metallic layer is provided at least between the adhesive layer on the lower side of the adhesive tape and the support film and a white paint film is provided at least between the adhesive layer on the upper side of the adhesive tape and the support film.
