Abstract (en)

[origin: WO2007063054A1] The invention relates to a clamping or guiding rail for a traction mechanism, especially a chain drive, comprising a carrier body and a slideway lining arranged in the carrier body. According to the invention, the carrier body (2) is a standardised component comprising at least one standardised fixing section (8) for slideway linings (7, 7', 7'') which differ in the form thereof but nevertheless comprise at least one standardised fixing section (9) corresponding to the at least one standardised fixing section (8) of the carrier body (2).
