Abstract (en)

[origin: EP2151624A2] The light has a spring-loaded locking unit (3a) retaining a transparent cover (4) in a covering position. The locking unit engages with an end area (3b) in a case (13) that is provided in a housing or the cover. A locking blade (17a) is laterally distant from the end area and is swivelable against a reset force. An end area (3c) of the locking unit is arranged in such a manner that the end area (3c) is engaged behind the housing or the cover. The locking blade with the end area (3b) has a flat angle which is exposed at an end of the end area (3b).
