Abstract (en)
[origin: WO2007066193A2] The present invention relates to a household cooking hob (10) of the type comprising: a plurality of heating elements, in particular burners (20), and a plurality of controls, in particular knobs (30), preferably located on the same side (11) of said cooking hob (10), the number of said controls (30) matching the number of heating elements (20) and each of said controls (30) being adapted to control a corresponding heating element (20). The present invention is characterized in that each heating element (20) of said plurality is aligned with: at least another heating element (20) along a first axis (X); - just one control (30) and no other heating element (20) along a second axis (Y).
