Abstract (en)  
[origin: US2009261704A1] A kitchen device, in particular, a refrigerator or freezer, with an interior, in which at least one height-adjustable support for accommodation of goods is provided, wherein at least one transport carriage running along guide rails is provided on the kitchen device, wherein said transport carriage may be fixed to the support and adjusted in height by a drive with a height adjustment. The invention is characterised in that the shell surface may be particularly simply and easily adjusted for height without the need to remove the goods from the kitchen device operation of the kitchen device being particularly simple.
