Abstract (en)
[origin: DE102007004342A1] The pluggable surge arrester has housing (1) for accommodating arrester element (5), which is connected to plug-type contacts (4b,6b), which pass through the housing base, via conductive connectors (4,6). The conductive connector has a switching tongue (4c), whose tongue end merges with a solder contact point (4d). The switching tongue has a current-sensitive desired breaking point (4e) or current sensitive characteristics. The desired breaking point is formed or exists in the region of the prestress force effect.
