Abstract (en)

[origin: WO2007065987A1] The invention relates to a method for rebuilding an ad hoc network, in particular a ZigBee-type network consisting (A) in collecting data of the network nodes in terms of quality of connections and non-optimal network trees, (B) in calculating a current optimised structure, (D) in setting optimisation data and injecting them into the network and (E) in rebuilding the network according to said current optimised structure.
