Abstract (en)

A package (1) for storing and transporting stackable products, particularly supports for bouquets of flowers and the like, comprising a first plurality (10) of stacked products (2), each of which has a bottom (3) from which a plurality of elongated and peripherally distributed elements (5) protrude substantially at right angles to the bottom and diverge outwardly, and further comprising at least one product (2) which can be superimposed on the first plurality (10) of products (2) and is arranged inverted with respect to the products (2) of the first plurality (10) of products, the inverted product having its own elongated elements (5) intercalated with respect to the elongated elements (5) of the products (2) of the first plurality (10).
