Abstract (en)

[origin: EP1958678A1] The assembly (1) has a retaining device (4) for removably attaching a plate (10) to a base (20). The plate is structured and arranged with the device for removably retaining a boot (2). The base is structured and arranged to be associated with a gliding board (3) i.e. ski. An arrangement longitudinally guides the plate with respect to the base. The device includes a manually actuated immobilization mechanism for immobilizing the plate with respect to the base along a longitudinal guiding direction.
