Abstract (en)

An accessory for the bowl (12) of a lavatory, having an upper edge (14), substantially annular in shape, comprises at least a first hygienic board (28) mating in shape with that of said upper edge (14), able to function as a partial cover for the latter and able to be hinged on the bowl (12) so as to be selectively moved with respect to the upper edge between a lowered position, covering the latter, and a raised position. A delivery means (26) is also provided, able to deliver water and to be disposed in correspondence with the upper edge, in the hinging zone (17) of the first hygienic board (28). The first hygienic board (28) is provided with a rear portion (29) able to function as an at least partial cover for the delivery means (26), when it is in the lowered position.
