Abstract (en)  
A refrigerator includes a main body cabinet having a storage room formed with a front opening, a door which opens and closes the front opening, and a display unit that is mounted on at least one of the main body cabinet and the door. The display unit includes a display displaying an image, a power supply unit selectively supplying power to the display, a temperature detector detecting a temperature of the display, and a controller controlling the power supply unit to interrupt the power supplied to the display when the temperature detected by the temperature detector is higher than a predetermined maximum temperature.
