Abstract (en)

[origin: EP1959355A2] A document edit device includes: object obtaining unit configured to obtain an object; a calculating unit configured to calculate a golden division line, the golden division line being a line that divides at the golden ratio a distance between two reference lines, each reference line being determined on the basis of a target area in which the object is displayed; and an editing unit configured to edit a size of the object so that the object contacts two lines, the two lines being selected from among the calculated golden division line and the boundary of the target area.
