Abstract (en)

[origin: EP1959712A2] The hearing device has a listener (4), which has a listener housing (10), and an electric coil (14), which is fixed on an immediate portion of the listener housing. The major axis of the electric coil stands vertical to the surface of the portion of the listener housing. The electric coil is inserted with the listener in series. The electric coil is of helical form. The electric coil has a polyamide substrate as wearer (15).
