Abstract (en)
[origin: CA2631735A1] The invention relates to a decorative element for the human body in the form of a breast clasp which can be worn on the person. The invention is characterized in that the at least one breast clasp can be worn in the crease beneath a female breast and is held in place by means of a clamping and adhering action, and in that the at least one breast clasp is designed as a curved element and performs a forming and/or supporting function for the female breast.
