Abstract (en)

[origin: WO2007068878A1] A roller (10) having a cylindrical housing (12) with a central bore (14) of variable diameter and a channel (20) between the bore (14) and the housing (12). Air can flow from the bore into the channel. An air-cooled roller designed to provide a uniform temperature gradient across the entire length of the roller, for use inter alia in printing equipment.
