Abstract (en)
[origin: WO2007065841A1] The invention relates to a method for producing recording materials that can be printed using an ink-jet printer, said materials having a gel layer and the method being characterised by the following steps: a) a supporting material is coated with a dispersion or solution of an organic gelatinising agent, which can be chemically cross-linked by polycondensation or polyadduct formation; b) the gel is then formed by polycondensation or polyadduct formation; and c) finally the gel is dried.
