Abstract (en)

[origin: US2009212677A1] A door for closing a washing machine which can be loaded from the front or a tumble dryer of this type is connected to the housing by means of a hinge in such a way that the door can be pivoted over a great opening angle and terminates flushly or approximately flushly to the outside with the front face of the housing. To this end, the door-side hinge part is installed and fastened in a recessed receptacle between the frame parts and of the door. The hinge parts and each have a crescent-shaped base plate and which extends along the door frame and reaches beyond the lateral apertures and the bearing blocks which are provided in the frame.
