Abstract (en)
[origin: WO2007069005A1] A device (100) for automatizing fluid sampling and bio- luminometric analysis comprises a console (1) carrying its own tools, a luminometer (2) , a horizontally sliding handling set to which a vertically sliding head (200) is associated, said vertically sliding head (200) lodging on it a metering syringe, sterilizing and cleaning means for said metering syringe (19) , storing, withdrawing and location means suitable to receive the samples to be analyzed, a multifunction cylinder (4) provided with a recirculation path and a withdrawing well for the fluid samples, and a number reagent withdrawing wells, and electronic means for processing data from said luminometer.
