Abstract (en)

A method of customizing a blade holder (12) for an ice skate (10), the method comprising: (a) providing to a customer a blade holder body (13) being at least partly made of a clear material and comprising a front pedestal (24) with a front inner surface (42), a rear pedestal (26) with a rear inner surface (44) and a bridge portion (28) interconnecting the front and rear pedestals, the front and rear inner surfaces defining respective front and rear cavities (30, 32); (b) providing to the customer a plurality of graphical elements; (c) receiving from the customer an indication of a certain graphical element selected from the plurality of graphical elements; and (d) providing one of the front and rear cavities with the selected graphical element (34; 36) such that the selected graphical element is visible through the clear material.
