Abstract (en)

A quick sorting binder for filing documents in sheet form or the like, comprising a binder body (2) composed of two cover sheets, respectively a front cover (3) and a back cover (4), which are connected to each other by a spine (5) and can fold with respect to the spine along mutually parallel folding lines or scorings (6, 7) for the passage of the binder body (2) from an open position, in which the front cover (3) and the back cover (4) are substantially coplanar, to a closed position, in which the front cover (3) and the back cover (4) face each other, and vice versa. In the spine (5) there is a slot (10) through which it is possible to insert, within the binder body (2), even in the closed position, sheets (30) or the like to be filed in the binder.
