Abstract (en)

An electrical appliance (1) having: a casing (2); a work environment (3) supported inside the casing (2) and having a loading/unloading opening (4); a door (5) supported by the casing (2) to close the loading/unloading opening (4) of the work environment (3); and connecting means (6) for connecting the door (5) to the casing (2) so that the door (5) can be moved between a closed position and an open position, and having at least one first guide (7) formed on the casing (2), at least one first trolley (8) sliding along the first guide (7) and connected to the door (5), at least one second guide (9) formed on the door (5) and the same shape as the first guide (7), and at least one second trolley (10) sliding along the second guide (9) and connected to the casing (2); each guide (7, 9) has a curved first portion (11), along which the respective trolley (8, 10) slides when the door (5) nears the closed position, and a second portion (12), which is longer than the first portion (11) and is tangent to the first portion (11) at a point of connection (13) to the first portion (11).
