Abstract (en)  
[origin: EP1961893A2] An intrusion prevention enclosure, of the type which comprises a plurality of modular panels (2) and uprights (3) which can be associated with each other in a predefined ordered manner, so as to provide a barrier structure, comprising connecting means (4) for the detachable fixing of at least one panel (2) with at least one upright (3), provided with safety elements (5) which are adapted to avoid the loss and accidental disassembly of the connecting means (4) in the assembled configuration, the connecting means (4) comprising at least one engagement element (6a, 6b) which can be rigidly coupled detachably to at least one panel (2) and at least one element (7) for fastening at least one panel (2) to at least one upright (3), the at least one engagement element (6a, 6b) being associable with the at least one fastening element (7).
