Abstract (en)

[origin: EP1961951A1] Electrical connector (30) for an injector (20) comprising a connector body (32), a pin (38) being mechanically coupled to the connector body (32) and being electrically coupable to a power supply, and an electric conductor (34) being electrically coupled to the pin (38) and being electrically coupable to an actuator unit (28) of the injector (20), the electric conductor (34) comprising a first conducting element (35) and a second conducting element (36), the first conducting element (35) having a first rigidity, the second conducting element (36) being elastically deformable and having a second rigidity being smaller than the first rigidity of the first conducting element (35), and the first conducting element (35) being coupled electrically to the second conducting element (36) in a manner that the second conducting element (36) electrically bridges a section (35c) of the first conducting element (35).
