Abstract (en)
[origin: EP1962011A1] The device has a controller (10) and an electrical controlled protection device (18). A storage condenser (22) is provided between two control elements (12,20). The storage condenser provides the latter control element with energy for a control impulse and is charged by the former control element during disconnecting the controller and is discharged by a switching element (16) during connecting the controller.
