Abstract (en)

The invention relates to a method for fastening a functional component (1) to a carrier element (2) of a domestic appliance (3). To precisely fix the functional component to the carrier element the invention proposes the process steps: a) Applying a defined amount of adhesive (4) on a fixation area (5) of the functional component (1) or the carrier element (2); b) Positioning of the functional component (1) relatively to the carrier element (2) in a defined position by means of an actuator (6) of a mounting device (7); c) Pressing the fixation area (5) of the functional component (1) against the carrier element (2) by means of the actuator (6) of the mounting device (7), so that the fixation area (5) of the functional component (1) or of the carrier element (2) presses against a counter area (8) of the other part (2, 1). Furthermore, the invention relates to a mounting device (7) for fastening a functional component to a carrier element.
