Abstract (en)
[origin: EP1962032A1] The water reservoir has a cylindrical container, whose base (10), cover (12) and circulating wall (14) limits container interior (16) which has a cold water inlet (18) and a hot water outlet (20). An electric heater (26) is arranged in the container interior and has a small distance in a channel-like guiding element (30) that runs at an end with a water inlet (32). A section of the guiding element is formed by an intermediate base (22) in the container. The electric heater runs into a side of the intermediate base facing the base of the container.
