Abstract (en)

[origin: EP1962167A1] The element has two movable positioning parts (201,202), which are provided for adjusting functions and operating conditions, and are movable relative to each other, where the two movable positioning parts are rotatable around a common rotational axis. The two movable positioning parts are arranged in a direction of the rotational axis one behind the other, where the two movable positioning parts are designed in the shape of the cylinder. The two movable positioning parts exhibit same diameter. An independent claim is also included for a household device with a retractable operating element.
