Abstract (en)  
[origin: EP1962389A2] The protective arrangement has a socket, which has a baseplate, a through hole, and a frame that surrounds the through hole. The outer side of the protective arrangement has a profile. A hood (3) has a feed through (6) for a cable and an open front side that is formed in such a manner that it is suspended on the frame and at is lying against the outer side laminar. Independent claims are also included for the following: (1) a socket for a protective arrangement for plug-in connectors, which has a baseplate with a through hole (2) a hood for a protective arrangement for plug-in connectors, which has a feed through for a cable.
