Abstract (en)
[origin: WO2007073864A2] The invention relates to a vacuum cleaner, especially a floor vacuum cleaner (1), comprising a housing (4) in which a motor-operated suction fan as well as a device for generating the power supply of the fan motor (10) are disposed. In order to allow said vacuum cleaner to be operated on mains current as well as independently of mains current, both a battery (5) and a cable drum (2) are arranged in the housing (4) as permanently integrated components so as to selectively operate the vacuum cleaner (1) on battery power and on mains voltage.
