Abstract (en)

[origin: WO2007071474A1] The invention relates to the use of aluminum-based antiperspirant substances in cosmetic preparations to improve filaggrin expression in sweat gland pores of humans. The preparation increasing the antiperspirant effect comprises aluminum-based antiperspirant substances, preferably aluminum chlorohydrates, and one or several organic solvents that are selected among the group encompassing 1,1'-oxydi-2-propanol, hexyl salicylate, and/or methylethyl tetradecanoate.
