Abstract (en)

[origin: WO2007060107A1] The invention relates to specific aqueous aerosol formulations that are devoid of propellant, containing one or more anticholinergic agents of formula (1), in which X⁻<SUP/>represents an anion, and containing at least one pharmacologically compatible organic acid and optionally additional pharmacologically compatible adjuvants and/or complexing agents. The cation of formula (1') is contained in the preparation at a concentration of between 206.3 and 230.16 mg per 100 ml of medicament preparation.
