Abstract (en)

[origin: WO2007048897A2] The invention concerns a can for beverages comprising a protective lid. The can is provided with a protective lid (3) capable of being nested on the upper edge of the can (1, 2), said protective lid (3) being connected to the can (1, 2) via a pull-tab (4) integral with the lid (3). The inventive can is characterized in that the lid (3) and the pull-tab (4) constitute a single-piece unit made of the same metal of metal alloy as the can (1, 2), the end of the pull-tab opposite the lid (3) being fixed on the can (1, 2). The invention is useful for making protected reclosable cans for aerated and non-aerated beverages.
