Abstract (en)

[origin: FR2893924A1] The package has a sidewall (14) made of rigid or semi-rigid material and with a front panel (15) covering a front end (8) of a set of articles (2) e.g. can, with opposite sides (10, 11) adjacent to the front end. Side panels (16, 17) are arranged on both sides of the panel (15). A removable shutter (20) is placed in the front panel of the sidewall for permitting an access to the articles through the front end. The sidewall leaves a side (12) of the articles uncovered. A film (28) stretches the articles by covering the sides (10, 11) over the side panels (16, 17).
