Abstract (en)  
[origin: WO2007071237A1] The invention relates to a disposable beverage can (10) formed at least partly by a flexible film material (13, 130,16,19) wherein said can (10) comprises a top surface (16) and wherein said can comprises a discharge arrangement (101) comprising a pull -tab opener (11) formed in said top surface. According to the invention a drinking can may advantageously be formed by film material. The can may advantageously be suitable for use in the same way as conventional cans made of a solid wall and at the same time be manufactured in a very cost-efficient way. Moreover, the can may be disposed in a very environmental -friendly way.
