Abstract (en)

[origin: WO2007068764A1] The invention relates to a method for treating a fixed biological sample, comprising the following steps: i) a fixed biological sample is provided; ii) the fixed biological sample is contacted with an aqueous solution containing at least one nucleophilic reagent; and iii) the biological sample contacted with the aqueous solution is heated. The invention also relates to the biological sample obtained by means of said method, the use of a nucleophilic reagent for treating a fixed biological sample, a kit for isolating a biomolecule from a fixed biological sample, the use of said kit, and a method for treating a disease.
