Abstract (en)

[origin: DE102005057031A1] The device has a measuring cell (1), sample space (2), measuring space (3) and a sample (4). The sample is placed in the measuring cell, where the sample is divided after placement in the measuring cell in such a manner that permeability or fabric clearance of a medium of a permeable substance takes place exclusively through the sample. The sample is a solid state body, which is a polymer, plastic foil, package, cover, paper and wood.
