Abstract (en)
A combined set comprising at least two outside floor or wall covering elements (6) made of a synthetic material and a series of attachment members (3) for attaching said covering elements to a support (1), said covering elements having an upper and a lower surface and a first (15) and second (16) longitudinal edge, and wherein when attached on said support, a gap extends between the first and second longitudinal edges of two subsequently mounted covering elements. A first (8) and second opening (9) is applied adjacent to said first and second longitudinal edges, respectively, each forming a cavity therein. Said openings giving access to at a first (11-R) and second (10-L) anchoring lip designed and dimensioned so as to match with said attachment member.
